

NEW JERSEY EMERGENCY COMMUNICATIONS TEAM

Let's bring North and South Jersey together by combining efforts to offer "Public Service Communications" to the entire state!

The New Jersey Emergency Communications Team (NJECT) provides routine and emergency communications for local non-profit events to local, county, state, and federal authorities in times of disaster using our member resources.

Our objective is not replace any current group or organization, but supplement their activities with additional resources when necessary. Members will only be required to attend one meeting and one event per year.

This club's main goals are to disseminate information about events state wide to promote volunteerism through Amateur radio and to directly support those events with Amateur radio operators, like you.

We can do that through email, the email server, and directly over Amateur Radio Nets through our members.

CLUB HOSTED HAMCRAM™

Our HamCram is for those who would like to get their Amateur Radio License in one day; we offer a session which reviews the entire Technician question pool with a separate test session immediately afterwards. Please visit the HamCram website: <http://hamcram.net>
